

April Renée is the Keynote Speaker for Vaccine Information Coalition (VIC) and former President of The Autism Autoimmunity Project (TAAP). She presents worldwide in honor of her 4-year old autistic angel, who passed away on June 13th, 1999. April realized Casi was vaccine injured, before she received the “label” of autism. Autism is **1 in 67** children today and it’s impossible to have a genetic epidemic! ADD, ADHD, diabetes, cancer (and rising number of other dis-ease “labels”) are more prevalent than ever-the evidence points to vaccinations as the cause. She has dedicated the rest of her life to doing **WHATEVER** is necessary to help these innocent victims and the children-yet-to-be from the autism epidemic!

She is available for presentations, which is based on over 20 years of research and is all scientifically documented. April has written many articles in Chiropractic and Health magazines. She has been interviewed on radio shows such as RBN (Republic Broadcasting Network), “The Power Hour”, “Radio Liberty”, “We the People”, “Liberty Works Radio Network”, “Liberation Wellness Hour” “The Edge”, and many more. She was interviewed by WSVN FOX News and has been on “WYKE Christian Television”, in Florida. April travels the world presenting regularly at churches, chiropractic schools, health food stores, birthing centers, holistic groups, healing centers and chiropractic organizations. She has presented for Sherman Chiropractic College, Hallelujah Acres, Keiser University, Florida Chiropractic Society, Heritage Institute, Hippocrates Healing Institute, Whole Foods Market, Palmer Chiropractic College, Nutrition Smart, Rotary Club, New Medicine Expo, Expo of Heart, Southern Chiropractic Association, Missouri Chiropractic Association, Shores Good Health Club and many more.

Visit our website @ www.vacinfo.org for an upcoming list of her free presentations and call 800-939-8227 to schedule one in your area. She will send you a flyer and you promote the event! “Please learn from our mistake and educate **BEFORE** you vaccinate”.
